12 April 1962

Chief, Task Force/W Chief of Station, JAMAVE

Operational/GUEOGE DIE, Santiago de Duba

ATTENTION REQUESTED: PH/KUCAGE/KUTURE.

- 1. On 9 April 1962, Jose Antonio Sadurni Casas (che "Che"), born
 11 April 1930, Santingo de Cuba; Miani address: F/o Elisa Sadurni Casas, Do
 1619 Meridian Ave., Apt. C-10 Miani Seath, telephone: JE 2-2611, was
 interviewed.
 - 2. Source said that during the revolution he wis a member of the DR in the University of Habana. After the revolution he went to the University of Origine, Santiago de Caba, and eventually become the DRE chief for the city. In regard to his former DN association he had no operational leads, claiming that all contact with IR members terminated in 1959; and he knew no one who attained any stature in the Castro Government.
 - 3. As DRE chief for Santiago, the source claimed that he had 50 members who he considered well organized and capable of any type of action. He said that there were, and are, other members, but he does not consider them in the same category with the 50 who are organized into cells. He said each cell has nine men. There are four cells in the University of Criente and two in the high school.
 - 4. He said that he left Santiago in March 1962 and turned the DRE over to his deputy. He then went to Habana and informed the DRE leadership that the second in command had taken over and he was told that Habana would initiate contact with the new leader. (Note: Since close relations are maintained by the JAMAVE Station and the DRE, no attempt was made to press the source for names and addresses, etc., as this information can be obtained in subsequent outside debriefings. The JEMAVS Officer responsible for the DRE operational matters was informed of the source's arrival and processing.)
 - 5. Source said that at the time he left Santiago, the remnants of the Catholic student organization was trying to make contact with the DiE and he believes that by this time this contact has been made. He said that the DNE member who was following this matter, and who would follow through, was a blind person.
 - 6. Listing the arms and supplies in the possession of the DRE in Santiago, the source said that it has about 5-3 pounds of plastic remaining out of a shipment of 20 pounds which was received from the DRE in liabana. He said the DRE in Sentiago placed bombs in places where the explosion would not injure anyone. As far as arms are concerned the source said that the DRE in Santiago has ten 15 caliber pistols; five 38 caliber pistols; one M-3; and one Torry gun.
 - 7. The source furnished the following NUNUEL-type information:

and that in order to try and get him free, the source went to see Kajor Belarmino "Anibal" Castilla, the chief of training for the Palma Soriano Military Encampent, whom he knew from their days in the Santiago Migh School. Source made his plea shi "Anibal" told him that before he could act upon it, he would have to talk to the source for five hours in order to determine his political orientation. The source replied that he did not come to talk politics but to plead for his father. "Anibal" answered that he would think about it and call the source one way or another, but he never called. Source thought that this story edequately demonstrated the (Communist) political orientation of "Anibal."

- b. The brother of "Anibal" (yers 6s above) is "Bertico" Castilla, first name possibly Alberto. He resigned from the army and is now living in Santiego, but the source is not clear on "Bertico's" political orientation.
- c. Electra Zernandez, the wife of Mendez Cominche (the Santiago G-2 chief), is no longer the civil head (comissionado) of Santiago. She is now the president of the Federacion de Mujeres Cubanas.

d. The source has given a complete military map of Oriente Province to the DRE member he left in charge of Santiago DRE (see para 4 above). Information is passed from Santiago to the DRE in Habana and the latter, in turn, is to forward the information to the States.

- e. Source said that his contacts who work in Bicaro report that the Micaro-Mayari Arriba area is restricted and that unknown types of military installations are being constructed.
- f. The foreign instructors in the University of Oriente consist of Czechs and Chileans. The Czechs have started a new medical school in the university and the Chileans have taken over the Business Administration Courses.
